Welcome Care Home

A Residential Care Home for the Elderly

Est. 1993

Our Philosophy

For over 25 years, we at the Welcome Care Home have been providing both personal and highly professional care in a friendly and homely environment. We believe in an holistic approach to care that embraces all aspects of life where each and every human being is defined by and deserving of human rights. We strive to promote and maintain individuality through choice and the right to privacy and dignity.

Caring For You

At the Welcome Care Home we can care for all but the most severe kinds of physical dependency. With the support from the General Practitioner and the NHS we are able to ensure quality care for terminal illness. Residents receive regular visits from medical practitioners such as the GP, Dentist and Optician. Physiotherapists, Chiropodists, Clergy, counsellors and Paint therapists are also available by appointment.

Activities

Residents are free to determine the range and scope of their daily rhythm and to pursue their favourite hobbies and past times. A range of activities are available and planned in accordance with the residents' interests, skills, experiences, personalities and medical condition. The activities available aim to reflect what Service Users aspire to do as individuals or as groups.

Accommodation

The home is a double fronted end of terrace house, located in the London suburb of Catford. The home has 14 bedrooms, all ensuite and arranged over three floors accessible with a staircase or a lift. The communal areas include a lounge, a dining room and a conservatory, overlooking a large mature garden with a fish pond.

Staff

Our staff are experienced, caring and committed, working closely as a team to promote a family atmosphere. We encourage all members of staff to respect the residents and each other and we expect staff to be respected in return. Regular training is provided to ensure understanding of the latest and best practices.
